Since 1990, Walther Janssen, together with his wife Elka, has consistently pursued the objective of developing a skin care system based on highly-effective active substances. Only active substances which convince with their extraordinary results and offer extremely high tolerability are used in the JANSSEN COSMETICS care systems.

JANSSEN COSMETICS undertakes research into unique active substance combinations with proven effect in close cooperation with the "Dr. Sacher Kosmetik" laboratory. All products are tested as regards their effect and tolerability and convince users on initial application.

New active substance complexes, process techniques and analysis results are immediately tested at JANSSEN COSMETICS and used in new developments. Since 2017, the JANSSEN COSMETICS quality management system has also been certified to ISO 9001:2015 in the areas of development, sales, marketing, training and logistics – internationally recognized proof of a tested quality management system.

Whether it concerns highly-effective cosmeceuticals, top-class skin care or body care rituals – JANSSEN COSMETICS leaves no desire unfulfilled!

COSMECEUTICALS

JANSSEN COSMETICS was the first German company to launch care products combining the best from the fields of pharmacy and cosmetics onto the market.

These so-called cosmeceuticals are care system products based on multiple, highly-effective, efficient active substances and enable the transition between pure beauty and scientifically based skin care. Each cosmeceutical series is based on an active substance concept which is optimally tailored to a specific skin type and achieves both visible and measurable results.

Cosmeceuticals do not act exclusively on the surface of the skin but achieve an effect deep down in the skin. The skin's different needs and requirements are specifically targeted, leading to an immediate and long-term improvement in the skin profile.

Talk to an advisor in one of our JANSSEN COSMETICS spas and find out which skin type series is the right one for you.

PROFESSIONAL TIP

To further intensify the effect of the cosmeceuticals, we offer a professional product range which is reserved exclusively for beauticians, thereby transforming treatment in the beauty salon into a uniquely effective experience.

DRY SKIN

NON-STOP MOISTURE FOR DRY SKIN

JANSSEN COSMETICS has developed a range that hones in on the requirements for treating dry skin, providing optimal care for both moisture- and oil-deficient dry skin.

Precious natural oils and innovative active ingredients like the 3 types of hyaluronic acid, Hydro Express Complex and Imperata cylindrica are just a few of the actives used to strengthen the skin's barrier function, increase moisture and lipid content long-term and make the skin surface smooth to the eye and touch. Regular treatment with DRY SKIN makes dry skin smooth and supple again, strengthening its natural protective film against external impact and premature skin aging.

COMBINATION SKIN

BALANCE AND

NORMALISATION

FOR COMBINATION SKIN

14

Partial sebum gland hyperactivity is the main cause of combination skin – usually due to predisposition or hormonal changes. Both dry and oily areas of skin characterize the combination skin profile. Special care to satisfy these contrary demands is vital. Combination Skin is based on the spectrum of effect of rice bran, also called inositol, an active substance which both intensively moisturizes the dry areas of skin and sustainably reduces the oily sheen on the forehead, nose and chin. A genuine multi-talent which acts to balance the skin's natural function and leave the complexion looking silky-matte.

PROFESSIONAL TIP

DEMANDING SKIN

YOUTHFUL FRESHNESS

AND VITALISATION

FOR DEMANDING SKIN

Exhaustion also leaves traces on young people's skin, causing initial wrinkles to become visible. In contrast to the years prior to this, the skin now becomes pale more quickly, appears more tired, tends to become dry and is more susceptible to degenerative processes. The skin is demanding and requires vitalizing care to combat premature loss of stability and resilience.

DEMANDING SKIN protects against premature skin aging and ensures that demanding skin remains looking youthful and fresh. Active substances penetrate deep into the skin, replenish its moisture deposits and stabilize its protective function. Premature skin aging is noticeably combated.

PLATINUM CARE

LUXURY MEETS PERFECTION

42

Platinum, one of the rarest and most precious raw materials on the planet, represents extraordinary luxury and pure elegance. This precious material has been combined with other anti-aging substances in the new, exclusive PLATINUM CARE range.

The unique complex is made up of three components: a very finely dispersed colloidal platinum, the high-tech peptide Matrixyl™ Synthe'6™ and a Persian silk tree extract. Platinum is among the Earth's rarest and most valuable raw materials. It smoothes and matts the skin's surface, and immediately improves the way the skin feels. The skin appears refreshed and relaxed. Matrixyl™ Synthe'6™ has an exceptional ability to fill in wrinkles and has proven that it smoothes the skin's surface texture. Wrinkles are filled in from within and the skin's substance is continuously strengthened over a long period of time. At the same time, a multi-action extract taken from the Persian silk tree reduces visible signs of fatigue such as rings around the eyes, swellings and other facial tiredness traits – and replaces them with a wonderfully youthful radiance.

PLATINUM CARE is pure luxury for the skin and heralds a new era of anti-aging care!
